With the old Modicon software, if you're online, you're editing the PLC memory directly, not the program you opened in the software. This in my opinion has always been a bad idea. Sounds like you do not have the PLC configuration set correctly, as far as the values for number of 0x, 1x, 3x, and 4x addresses allowed.

Hello everybody, I am attempting to communicate with a Modicon 984-685E using modsoft on a laptop running xp. I downloaded a program called direct io which is supposed to allow you to use modsoft with xp. With out direct io, the comm light on the processor would come on for a second then turn off and modsoft would just freeze up.

Modicon PLC 984-685E Anybody know how to use ADD or ADD16 to put the HEX value 7FFF into a register (4xxxx). I can't enter values in HEX and seem to be limited to decimal 9999. What I really trying to do is use ladder to ensure a certain register always gets loaded with this constant value through ladder.
