Proton Wira Engine Oil Leak

Our 1995 Proton Wira gave us excellent service until 2005 when the car developed an oil leak at the head gasket area below the distributor. The repairer removed head and gasket, machined head surface, then refitted the head with a new gasket, topped up all fluid levels and pressure tested it. Last week, to my horror I discovered the same oil leak has reappeared.

Oil Pan Leak. An oil pan is located at the bottom of the engine and is bolted to the block using many bolts and is sealed using a gasket. This oil pan is designed to collect oil into a centralized area allowing the oil pump to re-circulate it back into the engine. If the pan is damaged or if the gasket fails it can leak oil around the pan itself.
