4 History. Wire is a unique item used to connect mechanisms. Generally a mechanism is connected to a triggering item, like a Pressure Plate, Timer, Switch or Lever. Wires are placed using Wrenches, and are retrieved using the Wire Cutter, both of which can only be obtained from the Mechanic.

## **Wire - The Official Terraria Wiki**

The basic setup requires two triggers (switches, levers, or pressure plates), two teleporters and some wire. Teleporter A is connected to teleporter B via the wire and the triggers are connected using wire of the same color - one by each teleporter. Stand on the teleporter, hit the trigger, and you go from A to B or vice versa.

## **Steam Community :: Guide :: Introduction to Terraria Wiring**

Possibly one of the easiest wire creations in Terraria: the simple light switch. To create a light toggle system, all you need to do is use Wire to connect one or more "wire-able" Light Source (s) to a triggering device such as a timer, Lever, Switch or Pressure Plate. Many lights can be connected to a single triggering device on the same circuit.

## **Wire Creations | Terraria Wiki | Fandom**

The wire cutter is one of two wire based tools, the other being the wrench. Carrying a wire cutter while exploring the underground can be useful for identifying traps that trigger dart traps and...

You aren't going to be able to wire Heart Statues to be able to just stand there. They have an internal cooldown that essentially means that at best, you'll only ever be able to get 6 hearts every 10 seconds. That's 120 hp. Not very much. It's all detailed on the wiki on the statue page on the wiki. There is a way to do it with wiring though.
