Neanderthals modern humans first cousins were in Europe 1 million years ago before moderns were modern. They survived as species living with humans until about 30,000 years ago. They survived ice ages and warm periods managed to live in the same places and times as modern humans for over 50,000 years.

The Neanderthals Rediscovered: How Modern Science is ...

It turns out that the Neanderthals' behavior was surprisingly modern: they buried the dead, cared for the sick, hunted large animals in their prime, harvested seafood, and communicated with spoken language. Meanwhile, advances in DNA technologies are compelling us to reassess the Neanderthals' place in our own past.

Amazon.com: The Neanderthals Rediscovered: How Modern ...

The Neanderthals Rediscovered has the fresh charm of treating human evolution as a curious story that leads to the Neanderthals, rather than as a moral tale that rises ever upward and inevitably to us godlike moderns. Harper's

The Neanderthals Rediscovered: How Modern Science Is ...

For hundreds of thousands of years, Neanderthals evolved in Europe very much in parallel to the Homo sapiens line evolving in Africa, and, when both species made their first forays into Asia, the Neanderthals may even have had the upper hand. Here, Dimitra Papagianni and Michael A. Morse look at the Neanderthals through the full dramatic arc of their existence--from their evolution in Europe to their expansion to Siberia, their subsequent extinction, and ultimately their revival in popular ...

The Neanderthals Rediscovered, How Modern Science is ...

The hyoid bone and larynx in a modern human. It is not known whether Neanderthals were anatomically capable of speech and whether they actually spoke. The only bone in the vocal tract is the hyoid but is so fragile that no Neanderthal hyoid was found until 1983, when excavators discovered a well-preserved one on Neanderthal Kebara 2, Israel. It was largely similar to that of living humans.
